

Commander's Digital Assistant Version 5

Commander's Digital
Assistant (CDA) Version 5

Performance Characteristics

The Commander's Digital Assistant (CDA) Version 5, an early spiral-out from Land Warrior, will improve infantry unit battle command and tactical awareness. The CDA provides leaders at Company level and above a tactical picture that includes squad and team leader locations. The CDA has U.S. Army Standard Battle Command software and built in GPS and satellite communications. It is capable of digital and voice messaging over satellite or through other tactical communications systems. The CDA includes a computer processor and disk with embedded communications.
